2nd Gen AMD EPYC™ are a new breed of server processors which sets a higher standard for data centers.

Groundbreaking design makes AMD EPYC™ #1 in performance across industry standard benchmarks[1], holding 140+ world records to date. Performance you can count on to propel your modern data center workloads. 'Hardened at the Core' protection helps defend against side-channel attacks and EPYC's secure encrypted virtualization features help keep your data safe. The processor's agility helps you manage new deployments and changing workloads, with the system resources you need, simply and cost-effectively. AMD is the server processor company you can count on for innovation and leadership today and into the future.
