

ADAPTEC AFM-700 SUPERCAP KIT

Kod producenta: 2275400-R

Rodzaj opcji	FBU
Czas ochrony	nieograniczony
Pasuje do :	8885 8805 81605 72405 78165 71685 71605 7805
Gwarancja	36 m-cy

Enabling the onboard cache on a RAID adapter card significantly enhances performance — especially in RAID 5 and RAID 6 scenarios — by accommodating both read caching and write caching of data. But data stored in the cache for write caching can be lost if the cache is not protected against a power or system failure. Lithium-ion (Li-ion) battery backup units (BBUs) are traditionally employed to protect cached data on RAID adapters.
