

Qlogic SANbox SB3810-08A Fibre Channel Switch

Kod producenta: SB3810-08A

The QLogic 3810 Switch includes cost-conscious features, such as I/O StreamGuard and NPIV support. These switches provide the enterprise-class performance that QLogic's larger customers have come to depend on - at a price that will pay off immediately for even the smallest organization.

- 8 ports, 8Gbps speed (100% non-blocking)
- Backward compatibility with 4Gb and 2Gb devices
- Cost-optimized for single switch SANs
- QuickTools on-board GUI
- Command Line Interface (CLI)
- I/O StreamGuard - guaranteed stability for tape, video and other streaming applications
- NPIV support for virtualized environments
- Transparent Router (TR) technology provides seamless, NPIV standards-based interoperability with SANs from any vendor, while maintaining full switching services locally
