

Broadcom P411W-32P PCIe Gen 4 Switch Adapter (05-50054-00)

Kod producenta: 05-50054-00

Złącza wew.	4x SFF-8654
Typ złącza magistrali	PCI Express 4.0 x16
Format	Low Profile
Gwarancja	36 m-cy

UWAGA !!! Kontroler wymaga slotu PCI-E x16 4.0. Nie gwarantujemy pracy ze starszymi generacjami magistrali PCI-Express.

Broadcom's MegaRAID and HBA solutions are the industry's most widely deployed storage adapters. To this already robust line-up, NVMe switch adapters add another option for enterprise storage portfolios. Using Broadcom PEX PCIe switches, NVMe switch adapters provide a turn-key solution enabling quick expansion of native NVMe SSD storage. Switch adapters present the attached NVMe drives directly to the host using the native NVMe drive or OS drivers. The PEX switch delivers several innovative features including an embedded management processor. Key adapter features include:

- Flexible drive configuration supporting x1, x2, x4 NVMe drives
- Synthetic hierarchy support creating "Placeholder Endpoints" for any empty slots where a NVMe endpoint device could be later installed to the system without requiring a system re-boot.
- Surprise drive add and remove using standard system BIOS and OS software
- Support for SFF-TA-1005 or Universal Backplane Management (UBM)
