

PNY NVIDIA T4 Module 16GB GDDR6 ECC, PCI-E 3.0 x16, LP with ATX bracket mounted

Kod producenta: TCST4MATX-PB

Architecture	Turing
CUDA Cores	2560
Tensor Cores	320
FP32 Performance	8.1 TFLOPS
GPU Memory	16 GB
GPU Memory Type	GDDR6 ECC
Memory Bandwidth	300 GB/s
Memory Interface	256-bit
System Interface	PCI-E 3.0 x16
Max Power Consumption	70 W
Thermal Management	Passive

NVIDIA T4

Next-Level Acceleration Has Arrived

The artificial intelligence revolution surges forward, igniting opportunities for businesses to reimagine how they solve their customers’ challenges. We’re racing toward a future where every customer interaction, every product, every service offering will be touched and improved by AI. And making that future a reality requires a computing platform that can accelerate the full diversity of modern AI, enabling businesses to re-envision how they meet—and exceed—customer demands and cost-effectively scale their AI-based products and services.

The NVIDIA T4 GPU is among the world’s most powerful universal inference accelerators. Powered by NVIDIA Turing Tensor Cores, T4 provides revolutionary multi-precision inference performance to accelerate the diverse applications of modern AI. T4 is a part of the NVIDIA AI inference platform that supports all AI frameworks and provides comprehensive tooling and integrations to drastically simplify the development and deployment of advanced AI.
