

Qlogic HBA 8Gb/s Fibre Channell Quad Port PCI-Express Adapter (QLE2564-CK)

Part number: QLE2564-CK

IOPS per port

200000

QLogic 2500 Series

The QLE256x 8Gb Adapters are a part of QLogic's industry-leading Fibre Channel technology portfolio. The adapters not only meet the needs of today's demanding data center requirements by providing power and virtualization optimization, but also offer investment protection by being backwards compatible with previous generations of adapters, including 4Gb and 2Gb technology.

In addition to offering the highest performance, the QLE256x Adapters provide the lowest possible power consumption with QLogic's unique Dynamic Power Management technology. Plus, the series is optimized for virtualization, RAS (reliability, availability, serviceability), security, and management, transforming server connectivity into a competitive advantage. The QLE256x Adapters are also backed by an industry-leading five-year (no charge) limited warranty for -CK/-E SKUs.

- Lowest possible power consumption
- Optimized for virtualization, RAS, and more
- 200,000 IOPS per port
- Overlapping Protection Domains (OPD)
- RoHS compliant
